TO WHOM IT MAY CONCERN

Time, Cost & Quality (TCQ) was contracted for Major Capital Works (approximately \$4.5million) during 2001-2002.

TCQ undertook extensive building and refurbishment at Riverstone Public School which involved the consolidation of a 3 site school onto 1 site.

The project presented significant challenges for the building company and the school specifically related to the logistics of ensuring the smooth running and operation of the school whilst construction took place.

Every effort was made by TCQ and specifically the Onsite Supervisor, David Moore, to minimise disruption and accommodate the needs and requests of students, staff and parents.

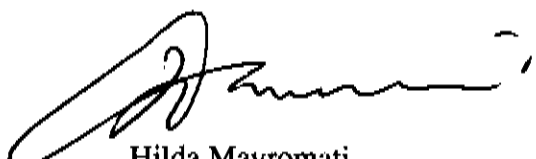

As issues arose they were dealt with promptly and efficiently and with consideration to the immediate needs of the school.

The final product, including construction of a new hall, canteen, 8 new classrooms, games court, refurbishment of existing buildings and landscaping is of high quality.

Teachers and parents have frequently commented on how wonderful the school now looks.

TCQ undertook a very challenging task, related professionally with the staff and made every effort to provide quality service in the process.

Yours faithfully

Hilda Mavromati
